❖ Tell Me About You?

I am **Tanvir Shinde**, completed Bachelor of Engineering from **North Maharashtra University, Jalgaon** having around 3+ years of experience in Software Testing and Automation. Currently working as a **Quality Analyst** in **HCL technologies Ltd,Pune.** My Responsibilities includes **Test Case Creation** and **Execution** by **understanding Requirements** and **Functionality**, Logging and fixing a **Defect,** Sending **Build Wise Status Report to my Lead**, participation in the **client call,** and involvement in preparation of Test **Plan etc.**

My strength is I am a quick learner, self-disciplined and punctual person. I always complete my work accurately and before deadlines.

My Weakness is Overthinking, Definitely I will overcome this. To overcome my overthinking I do Meditation every day.

❖ Tell me your Role and Responsibilities?

I am currently working here as a Software Test Engineer.

My Responsibilities includes:

Requirement analysis / US analysis/ understand.

- Identify Test scenario against US.
- Test cases writing against Test scenario.
- Test cases review (Internal/ external review).
- Test cases execution (Test proof).
- Defect raised/ created.
- Defect report against current sprint.
- Test summery report (Helping to Test lead) .
- Client interaction (Sprint review meeting- For respective US we will demo/ review)

❖ Why you think that you are fit for testing? / Why have you chosen this Testing Field? Why testing, tell me in only in one sentence? Or what should be the qualities of a tester?

- I know well how to break the thing than to make it &
- My attitude towards testing is thoroughly destructive but my work is constructive
- I am having lot of patience
- I am always thinking from the end user perspective
- Because of all these reason I think that I am fit for testing.

❖ **Automation testing profile roles and responsibilities?**

⬥ Identifying and selecting the automation test cases.
⬥ Creating and automation test plan and getting approval
⬥ Configuring selenium test environment (STE) in order to set up.
⬥ Create test cases using element locators, selenium webdriver commands.
⬥ Grouping of test cases, prioritization of test cases and execute test cases.
⬥ Create and execute test suite for regression testing.
⬥ Generate extent report for reporting which tell us execution records.

❖ **What is your daily routine?**

⬥ Come to office by 10:00 AM, first thing I do after login in my system, start reading emails also I check active sprints in JIRA for our project then I can see my assigned project task.
⬥ According to the priority of work get decided by me.
⬥ Then I go for tea and with a cup of tea attend daily scrum call and I have to give update of plan to the team.
⬥ If any blocker in my work I will discuss with team and get the solution.
⬥ After this meeting, start doing work test some modules, do sanity/retesting/regression testing run any automated test if I have.
⬥ If needed get more details from developer or lead for testing the modules if I don't know how much changes they did.
⬥ While execution if any bug found raise that bug in JIRA.
⬥ Then I go for lunch.
⬥ By this time, the developer who got assigned for defect will come to my place.
⬥ Give more details about the defect to developer and discuss with them if they need any help for fixing.
⬥ Once defect has been fixed and I resume the testing activities.
⬥ By the evening go for tea and then I might have a call with my colleague to give update them also.
⬥ By the 6 PM I left from the office.

❖ What should be the mindset of a tester?

- He should think from the end customer point of view.
- His attitude towards testing should be thoroughly destructive but his work should be constructive and then he will able to find out more and more bugs in the application.
- He should be a go-getter and having the ability to prove his opinion in spite of all odds.
- Having Lot of patience

❖ Why do you leave your last job?

- I want to develop myself in QA and to become the best in this area, learning and studying as much as I can.
- And I would like to become a lead and a mentor to help others in their development.

❖ What are you expecting from our company?

- I am expecting from your company that I will gain my knowledge and improve my skills and I will do my best in order to enhance the productivity of your company.
- I also want to get acquainted with new people who are interested in the same area as me.

❖ Why should we hire you?

- I really fit for this position because I have the great experience in this field. I will be a good team player because I enjoy the team atmosphere.
- I like the Software testing process and when team members work hand-in-hand with each other to reach the goal in the specified time line.
- I think your company is the right place to explore my skill and I want to be a part of your success.

❖ **Tell us about your salary expectations?**

- To be honest, the role interested me, and that's why I wish to work for your company.
- And I hope to be compensated according to my skill set and industry experience.

❖ **What problem you have faced in your carrier? OR What problem you have faced in your last project?**

- If we have less knowledge about project domain.
- If we have less time for testing.
- If we have less resources / less tester.
- If developer is not communicate properly/ developer making silly mistake.
- If we have problem in environments.
- If we have frequent changes in requirements.

❖ **Why QA?**

- I was always interested in Quality Analysis and I wanted to connect my life with IT world so I decided to start my career as QA Engineer.
- **Why QA?** Because the career in Software Testing involves stringent processes, scripting knowledge, the knack for details, business understanding, expert communications, an array of different testing types like security, performance, cloud, etc.
